## Special District Report.

The undersigned, members of the School Committee of the Special District, in presenting their annual report would reiterate the request of former committees for a closer intimacy between the parents of the scholars and those in charge of the schools. Your committee has endeavored to improve the general tone of the school as well as its efficiency, and have, we believe, met with a fair measure of success. Several new branches have been added to the course of study, including Geometry, English History, English Literature and Latin, while an advanced class has been formed from graduates of the school. The regular course, together with the advanced course, if faithfully pursued, should fit any scholar to enter any high school or academy with credit for at least two years high school work.

The teachers have done especially commendable work. Owing to the fact that this year a double railroad tax was received from the town, and also that the past year there was a special fund in the hands of the building committee that was available for school purposes, your committee was enabled to keep the schools running the usual length of time. In order to do this another year, it will be necessary to appropriate at least \$500 for school purposes at the annual school meeting for this district.
